SKILLS	**Web development**	HTML, CSS, JS, ReactJS, PHP, Oracle SQL, Express, MongoDB, Git

WORK EXPERIENCE

Frontend developer - Solera (AFP Habitat Project)
October 2022 - Present

- Developed the UI KIT for the affiliates interface using React, Styled Components and Storybook following the design accurately
- Created new features such as the process to affiliate a monthly contribution, a platform to receive documents, the creation of PDF reports and more

Frontend developer - Prayaga Solutions
September 2022 - October 2022

- Designed and built a new set of UI components for a dashboard, improving the user experience
- Contributed to new ideas to improve the user experience of a dashboard which were taken into consideration and finally implemented

Junior Frontend Developer - GCC Networking
April 2021 - March 2022

- My duties involved creating web solutions, from simple HTML, CSS to web applications using React, NodeJS, and MongoDB. Besides, I would have to create scripts to automate google sheets.

EDUCATION

Economics (2013 - 2016)
National University of Callao
